Vacuum anytime, anywhere, day or night

Built to last and perform like no other

The original GD930 Pro HEPA has been the optimum go-to vacuum for decades. Now, with its many new upgrades and enhancements, you'll unlock brand-new levels of productivity so that you can clean any space faster and more efficiently than ever before. Yet, it is also quieter than ever, allowing you to clean anytime without disrupting anyone. The GD930 is ideal for intense daily use by contract cleaners and in retail, healthcare, aged care, institutions, administration and hospitality.

Improving on perfection

Durability that's meant to last

Supercharge your productivity The GD930 delivers outstanding performance with a 5x larger HEPA filter for increased lifespan. Durable and tough, the GD930 is built for long lifespan, saving on total overall costs and reducing on environmental waste.

Get started without delay The quick-start cord release allows you to get moving on the job in an instant. The detachable as opposed to a fixed cord eliminates costly repairs and downtime with seamless, fast replacement by the operator. You'll also be able to maintain a safe environment by avoiding trip and fall accidents with the highly visible orange cable.

Clean comfortably with ergonomic design The HEPA filter is set in the lid for faster access. The lightweight aluminum tube and aluminum bent-end allows for easy maneuverability and ease of use. The rubber grip ensures comfortable handling, and lower noise output makes vacuuming safer for long time use. Additionally, enhanced cable management and storage on top of the lid allows for quick start-up and parking when performing multiple tasks.

Clean longer with larger fleece bags Increase productivity, save time, and reduces costs, as the new GD930 provides a very high filling capacity with the 15L container/dust bag. New fleece bags also improve filtration by up to 10% and increase performance levels over normal paper bags.

Your go-to for non-stop business operation

Cleaning in sound-sensitive areas with unmatched power

Technical specifications

Description	Unit	GD930 PRO HEPA S2
Reference number		107420775
Rated power	W	1000
Airflow	L/min	1440/2100
Vacuum at nozzle	kPa	23
Tool Diameter	mm	32
Hose Diameter	mm	32
Working sound level (IEC 60335-2-69)	dB(A)	52/48
Dust bag capacity	L	15
Main filter type		Large HEPA H13
Main filter area	cm ²	12000
Cable length	m	15
Dimension (LxWxH)	mm	440x390x330
Weight	kg	8
