

The future of wet and dry vacuum cleaning

The Nilfisk VL500 series of wet and dry vacuum cleaners offers performance and reliability that ensures a low total cost of ownership and makes daily cleaning tasks easier, faster and safer.

The Nilfisk VL500 is ideally suited for hotels, contract cleaners, education, exhibition and conference centres as well as public buildings, manufacturing and industrial applications.

A failsafe filter design makes operation easy due to the ability to have individual wet and dry filters working simultaneously. Each filter is specific for either a wet or dry application ensuring maximum performance. With the special dual filtration system, The Nilfisk VL500 can be used in wet or dry environments without the need to change filters.

The unique tipping design of the VL500 means that containers can be emptied quickly and safely. The VL500 is available in 35 or 75 litre container sizes.

- The dual filtration system allows the machine to clean both wet and dry applications without the need to change filter
- Multi fit hose connector, stainless steel tube, accessory storage and nozzle parking
- Easy changing of filters with a hinged motor head to protect the machine and speed up the process
- One year commercial warranty
