HZD570 H-Class Dry Vacuum (Dual Motor)

The Numatic HZD570 vacuum has been specifically designed to meet the requirements of users who need to safely remove dust that could constitute a health hazard.

The HZD570 is a dual motor version and is best suited to applications where larger volumes of hazardous dust need to be collected. It is the recommended vacuum for silica dust encapsulation when using the optional Microflo dustbags.

The HZD570 is built to last, with an all steel construction power head, fitted to a heavy duty structofoam container.

The HEPA H13 filter is securely mounted within a steel module with a separate primary pre filter mounted within the main container.

The use of Numatic HepaFlo dust bags allows for easy and safe emptying of dust.

- 2 Year Warranty
- 23L H-Class Compliant dry only vacuum – IEC/EN 60335-2-69
- Dual motors for increased airflow
- Indicator light to warn when filter or bag is full
- 15m cable - Nucable system allows for easy cable replacement
